

YASWANTH REDDY JONNALAGADDA

Senior Network and Security Engineer

Fairfax, VA | (571) 354-5212 | Yaswanthreddy08@gmail.com

SUMMARY

Senior Network and Security Engineer with 6 years of experience securing and automating enterprise networks and multi-cloud environments for regulated financial services organizations, including Capital One and Freddie Mac. Delivered a data center fabric consolidation, a 25-site SD-WAN migration that raised application SLAs from 95% to 99.5%, and a cloud security program that reduced findings 70% across 60+ AWS accounts. Combines deep routing, firewall, and Zero Trust expertise with Python, Terraform, and Kubernetes network security.

SKILLS

Networking: Border Gateway Protocol (BGP), Open Shortest Path First (OSPF), Ethernet VPN with Virtual Extensible LAN (EVPN-VXLAN), Software-Defined WAN (SD-WAN), Virtual Routing and Forwarding (VRF), VLANs; Cisco Nexus and Catalyst, Juniper, Arista, F5 BIG-IP

Network and Cloud Security: Palo Alto Networks (Panorama), Fortinet FortiGate, Cisco Firepower; Zero Trust, Illumio microsegmentation, Network Access Control (NAC) with Cisco ISE and 802.1X, IPsec VPN; Amazon Web Services (AWS) and Microsoft Azure security, Wiz, Prisma Cloud, Microsoft Defender for Cloud, GuardDuty, Security Hub, Identity and Access Management (IAM)

Automation and Containers: Python, Ansible, Terraform, Infrastructure as Code (IaC), CI/CD (GitHub Actions, Jenkins), Policy as Code (Checkov, tfsec, OPA), Git; Kubernetes network security (CNI network policies, ingress, egress), Amazon EKS, Azure AKS, Docker

Operations: SolarWinds, Splunk, Wireshark, NetFlow, Infoblox DDI (DNS, DHCP, IPAM), ServiceNow, ITIL change management, root cause analysis (RCA)

EXPERIENCE

Capital One, McLean, VA | February 2025 - Present | Senior Network and Security Engineer

- Designed and deployed an EVPN-VXLAN spine-leaf data center fabric on Cisco Nexus 9000 and Arista with BGP, VRF, and MLAG, consolidating 12 legacy VLAN architectures into one multi-tenant fabric.
- Managed Palo Alto (Panorama), Fortinet, and Cisco Firepower firewalls for Zero Trust enforcement; automated policy for 200+ appliances with Terraform and Ansible, cutting change time from 4 hours to 15 minutes.
- Reduced cloud security findings 70% across 60+ AWS accounts using Wiz, Prisma Cloud, and Microsoft Defender for Cloud; enforced Checkov, tfsec, and OPA policy-as-code gates in GitHub Actions and Jenkins pipelines.
- Hardened AWS and Azure network posture with Security Group and NACL baselines, VPC and VNet segmentation, AWS Network Firewall, and Azure Firewall; remediated over-privileged IAM roles.
- Implemented Illumio microsegmentation and Kubernetes network security on Amazon EKS and Azure AKS using CNI network policies, ingress controllers, and controlled cluster egress.
- Built GuardDuty, Security Hub, and Defender detection pipelines into Splunk with tuned alerting; served as senior Level 3 escalation, leading root cause analysis and change advisory board reviews.

Freddie Mac, McLean, VA | February 2023 - January 2025 | Network Engineer

- Led a Cisco SD-WAN (Viptela) migration across 25 branch sites with zero-downtime cutovers and sub-second failover, improving application SLAs from 95% to 99.5% and reducing WAN costs by \$280K annually.
- Consolidated 1,200 legacy firewall rules into 400 optimized Zero Trust policies across Palo Alto PA-5200 and Cisco Firepower.
- Automated configuration backups, audits, and pre- and post-change validation with Python and Ansible in CI/CD; built Splunk dashboards that improved detection speed 60% and reduced MTTR 35%.
- Configured BGP and OSPF routing, IPsec and DMVPN tunnels, and Cisco and Juniper switching across production data centers; integrated Infoblox DDI for DNS, DHCP, and IPAM.

Capri Global Capital Ltd., Hyderabad, India | May 2019 - July 2021 | Network Engineer

- Scaled enterprise LAN and WAN for 2,000 users across 15 sites at 99.95% uptime; configured multi-homed BGP and OSPF across dual ISPs with sub-second failover, reducing bandwidth costs 20%.
- Deployed Fortinet FortiGate firewalls and IPsec VPNs across 10 offices, cutting VPN incidents 45%; implemented VLAN segmentation, DMZ zones, and 802.1X NAC policies.

EDUCATION

Master of Science (MS), Computer Technology | Eastern Illinois University, Charleston, IL | December 2022

Bachelor of Technology (BTech), Electrical and Electronics Engineering | JNTU, Hyderabad, India | April 2019

CERTIFICATIONS

AWS Certified Advanced Networking - Specialty (ANS-C01) | AWS Certified Security - Specialty (SCS-C03) | Microsoft Certified: Azure Network Engineer Associate (AZ-700) | Cisco Certified Network Associate (CCNA)
